If you want to buy a cheap car in Norfolk find a [used car supermarket in Norfolk](#) . I would recommend a visit to Stebbings Car Superstore as you can see a big choice of cars. You should research on the dealer website before you arrange a test drive and narrow down your choice of make, model, derivative, engine and transmission. You may wish to consider environmental factors for low cost motoring such as engine capacity, emissions and tax band. Smart cars make for cheap low cost motoring and Stebbings have lots to choose from with full service history and used car warranty.
